RULES & REGULATIONS SUMMARY
(as of January 2009)

Refer to Chapter 130 and 322 CMR for details.

The following regulatory changes occurred during January 2008 through January 2009:

(Note: This is not a comprehensive list of all regulatory changes enacted during this period. It does NOT include regulations changed by emergency actions, nor does it include regulations that have been superseded by more recent changes.) Please contact the authors for more information or suggestions.

Atlantic Bluefin Tuna

1. The Director, through conditions on permits, banned purse seining for Atlantic bluefin tuna in Cape Cod Bay.

Bay Scallops

2. DMF finalized a clarification on which bay scallops are legal for harvest based on presence and location of an annual growth ring as well as size in some cases. The harvest and possession of seed scallops, defined as scallops without a well-defined raised annual growth line at least 10 millimeters (mm) from the hinge of the shell, is prohibited. An exception to this prohibition was established for those scallops that have a well-defined raised annual growth line located less than 10 mm from the hinge of the shell if the shell height is at least 63.5 mm (2.5”).

Black Sea Bass

3. The 2008 commercial black sea bass fishery operated under the *status quo* annual quota split with 50% of the quota allocated to the spring period (May – July) and 50% allocated to the fall period (August – December). The fishery operated under *status quo* gear-specific possession limits, however additional no-fishing days applied. Authorized commercial fishermen were able to fish for black sea bass during the spring period on Sunday, Monday and Wednesday only and during the fall period on Sunday, Monday, Wednesday and Thursday only.

Season	Gear Type	Possession Limit
May-Dec	Fish pot & weir	500-lbs.
	Lobster traps	100-lbs.
	All other authorized gear	200-lbs.

With two additional days off in the spring fishery and one additional day off in the fall fishery, *MarineFishes* hoped to mitigate the impacts of a shortened season and maintain product availability in the markets during traditional seasons.

Blue Crabs

4. MFC approved a new 50-blue crab possession limit for recreational and commercial harvesters. The Commonwealth’s southern embayments are the northern end of the blue crab’s reproductive range and there is no known commercial fishery due to low and fluctuating abundance and lack of local markets. The traditional harvest has been almost exclusively by non-commercial users using dipnets to catch crabs for personal consumption. This limit seeks to ensure sustainability of the blue crab resource and fisheries and minimize future commercial harvest.

Groundfish (including monkfish)

5. Commercial fishermen authorized to fish for monkfish may land and possess no more than 470-lbs. of monkfish tails or 1,560-lbs. of whole weight monkfish. Previously, fishermen with only state permits were unconstrained by monkfish possession limits. This limit maintains a limited fishery that has been conducted in waters under the jurisdiction of the Commonwealth.
6. The MFC approved the Division of Marine Fisheries (*MarineFishes*) recommendation to continue for an additional three years prohibitions on cod fishing in the CCZ during December & January (322 CMR 8.15, thereby lifting prior restrictions in place during the month of February. During the closure period no person shall harvest cod from waters under the jurisdiction of the Commonwealth north of latitude 42° 20’ and south of 42° 30’. It is unlawful for any person to fish, set, or abandon any gear capable of harvesting cod in this CCZ during the restricted season. This prohibition applies to all gillnets, otter trawls, mid-water trawls,

seines, and all hook-and-line gears including longlines, rod-and-reel, and handlines, however exempted gears include lobster traps, and drags used for scallops and urchins.

Hook Gear

7. As of March 6, 2008 persons issued a new commercial permit authorizing use of hook gear in a fishery, excluding striped bass, may be subject to future management restrictions. At this time, no management restrictions have been proposed; any future regulatory proposals would go to public hearing. Previously, a November 4, 2004 hook gear control date was in effect, but expired in 2006.

Horseshoe Crab

8. Regulations were enacted to cap landings near current levels in anticipation of unprecedented pressure on Massachusetts fisheries, resulting from shortages of crabs in other states. The actions included: 1) a lowering of the daily catch limit from 1,000 to 400 crabs, 2) a moratorium on new permits, 3) a new overall quota limit of 165,000 crabs (down from 330,377 crabs) and 4) seasonal, temporary closure of the fishery to allow accounting of landings to determine catch levels.

River Herring

9. The MFC also approved continuing the current moratorium on directed harvest of river herring for another three years, through 2011. The allowed tolerance for bait fisheries (5% by count of any batch) was unchanged.

Scup

10. The 2008 commercial scup quota set-aside for weir fishermen has been established at 121,500-lbs. This is commensurate with a 46% cut in commercial harvest mandated by the ASMFC. Commercial pot fishermen and hook and line fishermen were allowed nominal amounts of scup during the spring sea bass fishery on “open” sea bass fishing days.

Since *Marine Fisheries* has decreased these “open” sea bass fishing days, commercial pot and hook & line fishermen were allowed to land and possess scup on Monday, Wednesday & Sunday during May – July, or until 50% of the quota has been harvested, and on Monday, Wednesday, Thursday & Sunday during August through December, or until 100% of the quota has been harvested. The fishery operated under *status quo* gear-specific possession limits, quota dependent.

Season	Gear Type	Possession Limit
Jan-Dec	Fish Weir	None
Apr 23 – Jul	Trawlers	400-lbs.
May – Jul	Fish pot & hook-and-line	200-lbs.
Aug – Oct		400-lbs.
Nov - Dec	All authorized gear types	2,000-lbs.

11. Recreational fishermen are subject to the following minimum sizes, open season and possession limits when recreationally fishing for scup:

Sector	Minimum Size	Open Season	Possession Limit
Private	10.5” (no change)	May 24 – Sep 26 (new)	10 fish (new)
For-hire	11” (new)	May 15 – Jun 28: 45-days (new)	45 fish (new)
		Jun 29 – Sep 17: 81-days (new)	10 fish (new)

These regulations implement regional measures approved by states from (Massachusetts through New York) through an interstate agreement.

Summer Flounder (Fluke)

MASSACHUSETTS DIVISION OF MARINE FISHERIES
RULES & REGULATIONS SUMMARY
(as of January 2009)

Refer to Chapter 130 and 322 CMR for details.

12. The Commission approved as final a recent emergency action to open the 2008 commercial fluke fishery on February 1st under a 500-lb. daily possession limit as well as changes to fishery sub-periods.

In the past, there has been a winter fishery divided into two sub-periods allocated 15% of the quota each, the first starting January 1 and the second beginning November 1, and a summer fishery beginning on April 23 that was allocated the remaining 70% of the quota.

The goal was to constrain landings to prevent an inadvertent reduction in the summer sub-quota. However, due to the high catch rates and volume of landings in January 2007, over 10% of the quota was harvested during the first five days of the Winter I fishery. The February start date for the winter period should markedly reduce the rate of quota consumption and fluke landings to the Commonwealth.

New regulations revise the sub-periods. Instead of Winter I/II and Summer sub-periods, the February – April 22 sub-period is now referred to as Period I. The Period I fishery possession limit drops to 100-lbs. when 25% of the annual quota has been reached. Period II opens on April 23rd and runs through December 31st or the quota is harvested, whichever comes first.

The Period II possession limits remain the same as the traditional summer period limits:

Gear Type	4/23-6/9	6/10-12.31, or quota is harvested
Net	100-lbs.	300-lbs.
Longlines	100-lbs.	200-lbs.
Handline or Rod&Reel	Landing & possession prohibited	200-lbs.
